

VEHICLE KEY SERVICES

“More keys for more vehicles than any other provider.”

Car Key Network is one of the UK's largest providers of replacement car keys and associated vehicle repairs, supplying around 9,000 keys per annum exclusively to fleet operators and the automotive trade.

Approved relationships with vehicle manufacturers provides access to OEM parts faster than traditional channels and the ability to program many keys no other provider can. Nationwide support is provided anywhere on the UK mainland to clients with Site and Field based requirements.

Site Operations - Expert engineers are assigned to automotive operations providing dedicated support to commercial site-based operations with an ongoing, regular requirement of between 10 and 150 vehicles per week.

Field Operations - A network of engineers approved to industry standards provide fast, reactive support to vehicles experiencing unexpected faults in the field and vehicles undergoing insurance related works.

Nationwide Coverage

The ability to reach 95% of the UK population within 60 minutes.¹

Faster Part Access

Direct relationships with OEMs and their approved retailers means faster access to parts than traditional channels.

Approved Programming

Security clearance provided by OEMs means a future proof solutions for the latest vehicle models and EVs.

Certified Works

All repairs are registered and certificated, confirming the required standards of work have been met.

As the UK's only Vehicle Security Operator (VSO) regulated by an external body, each repair performed is formally certificated, confirming the appropriate working standards have been met.

The performance of [Vehicle Key Services](#) is available exclusively to fleet and the automotive trade.
